HORSE NAME

PASSPORT NUMBER

SAEF/E/0906

Completing this passport:

1. Enter the name of the horse on the cover page and ID page.
2. Enter the date and issue by the South African Equestrian Federation/Nominated Agent on page header "Details of Ownership".
3. Issue owner with passport.
4. On return of completed passport from owner, the South African Equestrian Federation/Nominated Agent must check as far as possible that all entries are fully and accurately completed and then take the following action:
 - "Details of Ownership": stamp and sign where indicated
 - "Description and Outline Diagram": stamp and sign where indicated
5. Photocopy cover page, detail of ownership page and description page.
6. Return passport to owner.

Owner - Received named, numbered, dated but otherwise blank passport from South African Equestrian Federation/Nominated Agent.

1. Complete page "Details of Ownership" with the exception of the date column and column for South African Equestrian Federation/Nominated Agent.
2. Request own veterinarian to complete the "Description and Outline Diagram" page and relevant "Vaccination Record".
3. Ensure that Equine Influenza and African Horse Sickness vaccinations are kept up to date.
4. Return completed passport to South African Equestrian Federation/Nominated Agent.

Veterinarian

1. Complete "Description" year of birth, sex, colour, country of birth and breeding details (where known - obtain details from owner) in **black block capitals**. No line should be left blank.
2. Complete "Outline diagram" using a red ball point pen to outline white markings without shading but lightly hatched if desired, and black ball point pen to indicate whorls and other markings. Particular attention should be paid to whorls (shown with an "X" on the head (universal), neck (universal) and jugular region (common) and to rear view of fore and hind legs. A Permanent scar is indicated by an arrow pointing to the site. Acquired marks such as tattoos and brands are indicated by a sketch. A de-pigmented area on a hoof (especially common in grey horses) is indicated by a sketch and coloured red. Finally, date, stamp and sign where indicated, thereby authenticating the identity of the horse.
3. Complete relevant vaccination record. Primary influenza vaccination must be entered in addition to annual boosters as well as African Horse Sickness inoculations.
4. Complete "Laboratory Health Tests" when such tests are performed. Entries must be certified with the veterinarian's name and signature.

HORSE NAME

PASSPORT NUMBER

SAEF/E/0906

No alterations to any errors/incorrect entries in the passport are permitted. Any such errors/incorrect entries must have a line drawn through the mistake and a new entry made and signed by the veterinarian.

Please ensure that all entries in the passport are accurate and complete.

Details of ownership:

1. The nationality of the horse is that of the owner.
2. Request own veterinarian to complete the "Description and Outline Diagram" page and relevant "Vaccination Record".
3. If there is more than one owner or the horse is owned by a company, then the name of the individual responsible for the horse shall be entered in the passport with his nationality. If the owners are of different nationalities, they have to determine the nationality of the horse.

COMPULSORY INOCULATIONS

African Horse Sickness

1. All inoculations against African Horse Sickness must be administered by a Registered Veterinarian, who must fully record the vaccination in the horse's passport and sign in the relevant place.
2. The vaccine is live and must be cared for in accordance with the manufacturers instructions otherwise it will lose its effectiveness. The inoculations must be given annually and there must be an interval of at least 21 days between the first and second inoculation.
3. Owners of horses domiciled in the African Horse Sickness Free Zone and Surveillance Zone should contact the South African Equestrian Federation/Nominated Agent for details of the regulations applicable to that area.

Equine Influenza

1. An initial Primary Course of two vaccinations must be given, the second vaccination must be administered within 21-92 days after the first vaccination. It is important that the primary course should consist of the same propriety vaccine.
2. The first booster must be administered within 7 calendar months following the date of administration of the second vaccination of the Primary Course.
3. Booster vaccinations must be administered at a maximum of 12 month intervals, however horses competing in events must have received a booster within 6 months + 21 days (and not within 7 days) before arrival at the event.
4. Horses may compete 7 days after receiving the second vaccination of the primary course. Horses that have received the Primary Course prior to 1 January 2005, are not required to fulfil the requirement for the first booster, providing there has not been an interval of more than 12 months between each of their subsequent annual booster vaccinations.

Please note all vaccinations must be administered, signed and stamped by a South African registered Veterinarian
